Summary

Final Year B.E. CSE student with hands-on experience in Python, full-stack web development, and AI-powered application development. Built RAG-based systems and web applications independently and collaboratively, with participation in SIH 2025. Seeking Full-Stack Developer or AI Application Developer roles to contribute to real-world engineering teams.

Education

Bachelor of Engineering in Computer Science — **Aug 2023 – Present**
Sri Ramakrishna Institute of Technology , Coimbatore. — CGPA : **8.065/10**

Senior Secondary(Class 12) – State Board — **May 2022 – Mar 2023**
Komarasamy Gounder Matric Hr Sec School , Nambiyur. — Percentage : **86/100**

Projects

Personal Portfolio Website — GitHub | Live Demo

- Developed a responsive portfolio website using React.js, HTML, CSS, and JavaScript, featuring a clean, modern UI.
- Implemented modern design principles to enhance user experience and deployed the website on GitHub Pages for a professional online presence.

AI Sales Analytics Agent — GitHub | Live Demo

- Developed an AI-powered sales analytics agent using Python, Gemini API, Pandas, and Flask, enabling natural language queries and automated business insights with Linear Regression-based sales trend forecasting.
- Reduced manual reporting effort by 45–55% through automated data analysis, predictive forecasting, and real-time visualization of sales performance and business trends.

Experience

Data Science Intern , LitzTech — **9 Jun - 23 Jun 2025**

- Performed exploratory data analysis on structured datasets using Python (Pandas, NumPy) to identify patterns and summarize key business metrics.
- Assisted in data cleaning and preprocessing pipeline, improving dataset quality for downstream analysis.
- Collaborated with cross-functional team to deliver an analytical report on business trends with the internship timeline.

Artificial Intelligence Internship , Infosys Springboard 7.0 (Virtual) — **6 Oct 2026– Present**

- Engineered a Retrieval-Augmented Generation (RAG) pipeline using Python to enable semantic search and context-aware retrieval from unstructured documents.
- Implemented document ingestion, recursive text chunking, vector embedding generation using Ollama (nomic-embed-text), and semantic indexing with ChromaDB.
- Developed modular REST APIs using FastAPI to automate document processing, vector storage, and similarity-based retrieval across PDF, DOCX, CSV, and TXT formats.

Skills

Languages : C , C++ , Python , HTML , CSS , JavaScript
Frameworks & Libraries : Flask , Pandas, NumPy, React.js, Node.js
Tools & Platforms : Git, GitHub, VS Code, Render, Vercel
Databases : MongoDB, MySQL
Concepts : Data Structures & Algorithms, REST APIs, Object-Oriented Programming

Achievements

- **Smart India Hackathon(SIH) 2025 –** Won 1st Prize at the College Level as part of a team; developed a real time Bus Tracking System and selected among all college teams for submission to the national round.

Certificates

AWS Skill Builder : AWS Cloud Practitioner Essentials.
NPTEL : Design Thinking - A Premier (Elite + Silver) , Google Cloud Computing
Workshops : Collaborative Robotics.
